PREFACE

This book is created due to the humanities need say and talk about each other's cares.

For years Greeks had been acting against the human rights without giving a chance for us to breath, where we were not even able to make our voice heard to our closest ones, but nevertheless the days are left behind which we could not ask for the help of humanity in order to solve our problems.

As the Turkish Minority in Greece, we do not want the world to be a witness to an example as it is in Bulgaria.

And therefore we say lets all say stop to Greece, which she considers the agreements, statements and laws are null and void, without even giving the smallest right of a human being, while acting brutally as some of the examples given in this book.

We want the unfinished drama which has been continuing on the scene of the Western Thrace, to have a happy ending, at least after having some promising developments.

So on behalf of the various organizations of the countries in the world and even the smallest individual, should try to impede the massacre before its to late.

CONTENTS
